

myPortal Desktop Client

CTI Client

myPortal desktop is perfect for your busy telephony users who don't have Microsoft Outlook. Simple in design yet bringing an array of telephony integration to the user's desktop.

Available on both PC and MAC, myPortal Desktop is the perfect companion for busy telephony users. Instant access to favourites, directories and other system features, myPortal gives the user a clean yet powerful tool to improve their productivity.

Presence integration allows all users to see availability and call forwarding destinations. Advanced features such as one off and scheduled conferences can be controlled easily and effectively by the user. Ad-hoc call recording allows users to save important conversations to refer back to later, or forward to colleagues.

Legacy technologies are not forgotten either. For Instance, fax to, and from, the desktop is available as an additional bolt on licence for myPortal for Desktop.

myPortal helps users to become more productive. Seamless integration to directories and favourites means users can quickly and easily manage their calls, thereby getting the most from the new Unify telephony platform. The call control pop-up is a thing of beauty, delivering a simple yet powerful tool for your users at a click of a mouse button.
